

# PROCESS CELL WASHER & DRYER

FLT'S INDUSTRIAL WASHER & DRYER MACHINE not only boasts a 270° rotation head, high air pressure, and self-cleaning, it does it all under 80 Decibels. This all-in-one machine provides an elegant solution that's sure to fit your part cleaning requirements.

To ensure operator safety and accessibility, our machine is completely enclosed with an automated overhead door and provides safe process monitoring through the unbreakable plexiglass door.

## TECHNICAL DETAILS

- **Self Cleaning** – An automated self-cleaning cycle minimizes maintenance downtime.
- **Completely Enclosed** – Automated overhead door regulation and lock conditions ensure the machine remains closed during processing.
- **High Pressure Air** – Using modern air knives, high velocity air dries and cleans debris from the part.
- **80 dB Sound Insulated** – Minimizing noise pollution maintains a safe and enjoyable working environment.
- **270° Rotation** – Configurable rotation speed and multiple rotations per cycle ensures a thorough cleaning for every part.
- **Safe Process Monitoring** – The safety interlocked plexiglass door allows for active process monitoring.
