

PROCESS CELL LASER MARKER

FLT'S STATE-OF-THE-ART LASER MARKING SYSTEM etches part numbers, bar codes and images onto your parts. This fully automated system includes electronic image verification, live monitoring, and fume extraction. Its proven durability guarantees maximum uptime and minimum maintenance.

Where safety is concerned, so are we: Our laser marking systems come equipped with many built-in safety features without compromise to cycle time or etching ability. In addition, each enclosure is both FDA registered and 3rd party audited by laser specialists to verify Class 1 compliance.

TECHNICAL DETAILS

- **Powerful Etching Ability** – 2D matrix, human readable, images - custom etch whatever your process requires.
- **Camera Targeting & Verification** – Integrated imaging system evaluates, grades, and exports images on the fly.
- **Agile Fixturing** – Automatic fixture adjustment accommodates part type changes with no impact on cycle time.
- **Integrated Fume Extraction** – Eliminates harmful burn gases to keep your working environment safe.
- **Class 1 Safety Compliant** – 3rd party verified light-tight enclosure ensures safety compliance.
- **FDA Registered** – Each system comes with full FDA laser certification.
- **Utilizes Keyence Laser & Cognex Camera Systems**
